

PROMPT ENGINEERING ASSIGNMENTS

Use ChatGPT or any other AI chatbot (such as Google Gemini/Claude/Perplexity/Microsoft Copilot/X Grok/Meta Llama/Mistral) to carry out the tasks below.

You may use more than one to compare the outputs you get.

Best Practices to be followed

Role: Every prompt names the persona

Context: Every prompt provides detailed business environment and context

Clear Task List :Tasks broken into explicit, numbered subtasks.

Constraints & Metrics: Percentile targets, ROI thresholds, legal limits.

Structured Output: Tables, bullets, length caps for usability.

Data & Source Requirements: Citations, attached data, benchmarks.

Tone & Compliance Guardrails: E.g., medical device rules, HIPAA.

Iterative / Multi Step: Separating analysis from recommendations.

Task 1: Effective prompt – diet plan

Customize the following prompt – personalize it for you:

You are a seasoned nutritionist with 10 years of experience renowned for transforming even the most undisciplined and unhealthy individuals into health-conscious individuals.

I am a 47-year-old male. I would like to build muscles and remain lean. I have 8 hour desk job. My Food Preference is strictly vegetarian, with a preference for South Indian cuisine.

** Allergies: Almonds (avoidance required).*

** Health Condition: Elevated blood pressure.*

Ensure the total daily caloric intake is within 2,000 calories.

Create a weekly meal plan for me.

Copy-paste the above into multiple AI chatbots and observe its responses

Google Gemini: <https://gemini.google.com>

Microsoft Copilot: <https://copilot.microsoft.com>

OpenAI ChatGPT: <https://chatgpt.com>

Perplexity, Claude.ai, grok, deepseek are some others you may wish to try

Task 2: Document summarization and question answering

Download latest India budget speech from:

https://www.indiabudget.gov.in/doc/budget_speech.pdf

Upload it to any AI chatbot or to chatpdf.com or popai.pro

Interact with the document. Suggested prompts below

(Edit these and change the text in <> with your own)

- What is the summary of the speech
- Has the infrastructure <put your interest sector here> spend been increased or reduced?
- How are other Asian countries doing? Are they also increasing (or decreasing) their budget outlay in <your interest sector>

Task 3: Resume and JD matching

We will now look at how LLMs are able to powerfully match a job description against a bunch of resumes given to them.

Note that they are not just doing pattern matching, but going beyond it to look at context and meaning!

For example, “outstanding achievement” is matched with “published a paper”

Download the sample resumes and JD from the task3_resumes_data zip below:

https://drive.google.com/drive/folders/1bcdCjUEetCOOKiTqilDCj_17Xb7PuykX?usp=drive_link

direct link:

https://drive.google.com/file/d/1IHpOnGSf0M2FaJkV9p9i5ZbDxcEEVusT/view?usp=drive_link

Open chatgpt or google gemini and upload the resumes from the **resumes** folder

Copy paste one of the JDs from the JD folder and ask the AI chatbot to recommend which candidate will be a good match.

Task 4: Data Analytics – attrition prediction

We will now look at the analytics, insights and predictive capabilities of LLMs

Download employee data from following location:

https://drive.google.com/drive/folders/1bcdCjUEetCOOKiTqilDCj_17Xb7PuykX?usp=drive_link

Open chatgpt and upload the csv to it.

Ask questions such as:

Based on this data, which employees are at risk to leave the company? please explain with reasons

Task 5: Data Analytics – hiring trends dashboard

We will now look at the power of custom models to perform specific tasks such as charts and dashboard creation, insights.

Download employee hiring data zip from:

https://drive.google.com/drive/folders/1bcdCjUEetCOOKiTqilDCj_17Xb7PuykX?usp=drive_link

Open chatgpt and upload both the hiring data and the open positions csvs to it.

In the pdf in the zip you will see sample prompts and questions you can ask from this data and the charts and dashboards you can create

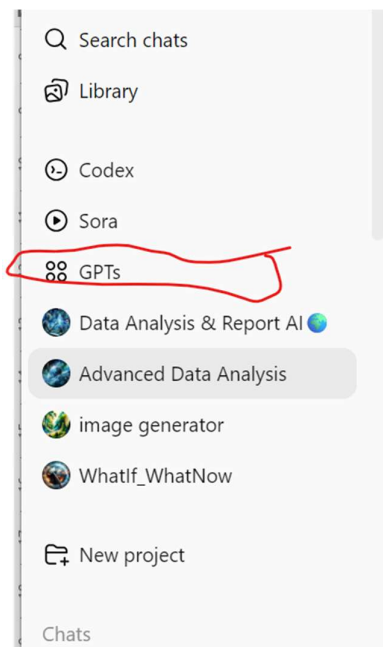

Task 6: Supply chain route optimization

We will now look at the power of custom models to perform predictive tasks.

Download supply chain zip from:

https://drive.google.com/file/d/1g99bX09hDcH0G3lhztqXDvOvbgKDx8Nt/view?usp=drive_link

Open chatgpt and chose the “Advanced Data Analysis” GPT

Open the “Route optimization prompt guide” provided in the zip file to guide you on the prompts you can ask.

Task 7. Salary Research & Compensation Strategy

Your company has a position open for **video editor** (replace this with a position more relevant to your company).

You plan to use AI chatbot to research the “going salaries” for this position so that you can decide on a competitive remuneration. Craft a prompt for the same

Starter bad prompt: What are average video-editor salaries?

Task 8. Research for Product market fitment

You are venturing into creating a product in **wearable health tech**. (Choose any other product or service as per your background)

You want to seek help from AI chatbot to do market research: understand TAM, fitment, opportunity, competitors, forecast etc. You need a Gartner style report and you want to use AI chatbot for the same.

Craft a prompt for this task

Starter poor prompt:

Give me some info about the wearable devices market for my new product.

Task 9. Sales and competitive positioning - Telco

You are “IndoTel”, a regional fiber & SD-WAN provider (ARR ₹1 100 cr). You are seeking advise on how to beat Airtel in this segment.

Starter poor prompt:

How can Indotel beat Airtel in enterprise sales?
