

DEVELOP USING LOCAL MODELS

LM STUDIO

Download LM Studio:

<https://lmstudio.ai/>

Install it and run it.

Choose a model such as Llama3 7B

Start the API Server

Test it using provided python code

OLLAMA

Note: Stop your LM Studio model before you load another model using ollama, so that your PC's memory gets freed up

Download OLLAMA:

<https://github.com/ollama/ollama>

Follow the following document to get started with model development with Ollama

<https://medium.com/ai-advances/run-llama-3-on-your-laptop-an-introduction-to-ollama-for-beginners-06ba8a110d12>
